(54) STEPPING MOTOR

(57)Abstract:

PURPOSE: To offer stepping motors constructed such as to avoid a stator unit backlash, which is due to the height of the stator unit itself when it is housed in a motor unit and which causes vibration and noise.

CONSTITUTION: A stepping motor 10 has a motor case 8 made of molded resin. During the molding of the motor case 8, stator units 1, 2 are made integral with the motor case 8 at all the surface other than their respective surfaces 1a, 2a opposed to a rotor, thereby eliminating the need for conventional clamp.

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
